PRICING

Please refer to Pricing Schedule – IoT Lite Data Plan.

SERVICE CONDITIONS

- IoT Lite Data plans are for use with machine-to-machine applications and solutions only. SIM cards are supplied by One New Zealand for the sole purpose of installing each SIM card into a Device for use only with Internet of Things (M2M) applications and solutions. This does not include mobile handsets.
- All data sessions will be rounded initially to 1KB; any data over 1KB will be rounded up to the nearest KB; rating occurs every 20 minutes or at the end of the data session.
- Exclusions on IoT Lite Data Plans include: video calling, roaming, in-flight roaming, and calling or texting premium numbers.
- You will not be sent alerts warning you when a particular volume of data has been consumed.
- Coverage can be affected by a number of factors, including radio interference, atmospheric conditions, geographic factors, network congestion, maintenance, outages on other networks and provider sites, the configuration or limitations of your Device or other operational or technical difficulties which means that you may not receive some or all of the Service in certain areas or at certain times.

MASTER SERVICES AGREEMENT

SERVICE DESCRIPTION

- You are responsible for ensuring that all devices are compatible with the network (as it evolves) at all times and that each device operates correctly as intended.
- The IoT Lite Data plans may not be used:
 - in a way that attempts to penetrate security measures whether or not the intrusion results in the corruption or loss of data; that uses the Services or software related to Internet Relay Chat, peer to peer file sharing, bit torrent, or proxy server network;
 - for the transmission of material that contains software viruses or any other disabling or damaging programs;
 - in a way that allows access to an IP address including through the use of a proxy, tunnelling, a gateway or routing. For the avoidance of doubt this shall not prevent you being able to connect over the internet to a your application server; or
 - in a way that involves spamming, the sending of bulk unsolicited emails or commercial messages or maintaining an open SMTP relay. You must not publish or share any benchmark or performance tests of the SIMs.
