PART C – SERVICE CONDITIONS

1. 1   This service is supported only on a Digital Matter cellular GPS tracking device from One New Zealand. The devices are specified to match the sensing and data logging use-case depending on the requirements they can support.

1. 2   Geo-fencing and breadcrumbs are dependent on device settings associated with the hardware and the plan.

1. 3   One New Zealand will dispatch the device to you with the activated SIM Card and Asset Management profile configuration completed.

1. 4   You are responsible for the installation of the device onto the Asset you would like to manage.

1. 5   One New Zealand will provide the mobile connectivity for delivery of this Service on One New Zealand's mobile network. The service is subject to availability of network coverage and operates in New Zealand only. See https://www.one.nz/network/coverage/ for coverage details.

1. 6   Asset Management is designed, implemented, and maintained to provide a high level of ongoing security. However, we do not offer guaranteed protection from external attacks, risks and/or viruses.

1. 7   Any modifications to the devices can affect warranty. This includes the installation process and attaching peripherals. You are responsible for complying with all privacy obligations in relation to individuals whose information is collected by this service, including providing all notifications and gaining all consents required by law.
